Yazoo	T. J. White	Yazoo City

RECOMMENDATIONS

1. For common schools the same amount of money, appropriated in the same way as in 1920, is needed. Although there were 60,000 more children in school last session than in any previous session, which necessitated the employment of approximately 2,000 more teachers than had ever been employed in any one session before, we think it not best to ask for an increase in the public school appropriation at this time. It is well to keep in mind the further fact that at practically every session of the legislature in the past, there has been an increase in this appropriation.

2. The school law in its present shape is a patchwork of inconsistencies and duplications. Furthermore, a great many sections of the law are very indefinite. The new Code being prepared by the Attorney-General and the State Superintendent of Education, should be adopted with such amendments and changes as the legislative committees and the legislature itself sees fit to make.

3. The office of County Superintendent of Education should be put on a professional, rather than a political basis. Counties should have the privilege of changing the method of selecting their county superintendent. In every State now bordering on Mississippi the county superintendent is selected by a board elected by the people. This board acts in the same manner for the county schools as the city and town boards of trustees for the town schools, with the exception that the local board of trustees of county schools has a voice in the selection of teachers.

4. The county superintendent of education should take office on June 1st, instead of January 1st. Under the present system every fourth year there is considerable loss of motion due to the fact that one county superintendent contracts with the teachers and starts the schools, and another, taking office in January, is supposed to pay the bills and close the schools.

5. Before the standard of teachers can be raised very much, a new certification law is necessary. The present law is entirely out of date and not workable.

6. The State Institutions should be on a millage basis and under a constitutional board of trustees appointed in such a way as to remove these Institutions, as far as possible, from political interference.

7. The State Text Book Law Should be amended in the following particulars:

(a) The Governor should not name the Commission.

(b) The Commission should be appointed at least a year before the adoption is to be made so that the adoption could be made at least six months before the books are to be delivered.

(c) The Commission should have authority by unanimous vote to adopt any text for a shorter period than five years.

(d) All the consolidated schools and the small town schools should use the same high school texts.

8. Every person actively engaged in school work should be required to stand a health examination every year. It is criminal to allow teachers suffering with tuberculosis of the lungs to teach.

9. Every county superintendent should be allowed some office help at least during the school term. Expenses incurred visiting schools should be borne by the county.

10. There should be one or more supervising teachers in every county.

11. The county superintendent and teachers should be charged with making the enumeration of educable children every four years thereby guaranteeing a more accurate roll than can be made by the assessor.

12. There should be increased facilities for the establishing of libraries in rural schools.

13. Our high schools should be given permission to do freshmen and sophomore college work so as to reduce the expense both to the state and the people, of giving college training to our boys and girls. The average high school graduate can be given the first two years of college work at home much cheaper to all concerned than is possible under our present arrangement.

14. The Federal Act providing for the rehabilitation of cripples should be accepted, and the legislation enacted necessary to give this unfortunate class of our people, who have never had a chance, to get that training which will, in a few months, enable them to make their own living instead of being dependent on friends or charity for an existence.

15. Whatever of the county school fund is to be disbursed for the aid of county school buildings, should be disbursed in the spring and not in the fall as our schools now operate in the winter and not in the summer.

16. Some system should be worked out that will require every county to aid in a financial way in the education of its children.

NARRATIVE REPORT OF THE STATE SUPERINTENDENT OF EDUCATION

FOREWORD.

Three years ago when an educational rating of the 48 States in the Union was made by the Russell-Sage Foundation of New York, we were very much humiliated to find our own State of Mississippi next to the last on the list. At first it was hard for us to believe we were doing less in an educational way for our children than any other State in the Union, except one. An investigation of the matter, however, showed that in the main our rating was not far from right, largely for two reasons:

1. Too many of our children were not attending school.
2. We were giving less support financially to our schools than almost any other State in the Union.

Since the meeting of the legislature in January, 1920, Mississippi has, because of the far reaching and fundamental laws passed concerning education, forged rapidly forward to such an extent that if a rating should be made today, we would be far from next to the bottom of the list. In fact, the records show that the school system of our State has made greater advancement in the last three years than any other State in the Union.

SCHOOL LAWS OF 1920.

The legislature that assembled at the capitol in 1920 and adjourned in April, did twice as much for schools as any other legislature that has ever met in the history of the State, and the present biennium has been devoted very largely to putting into operation the new school legislation. The following are some of the more important measures passed at the last session of the legislature:

1. The Compulsory Attendance Law.—This law has been in operation in every County of the State except Claiborne, Jefferson, Franklin, and Wilkinson, where it was voted out without being given a trial. Reports from the other 78 counties show that this law has done a great deal of good, and that it has been endorsed almost unanimously by the people. In several counties it brought to school from 1,000 to 1,500 white children over seven years of age who had never been to school. Altogether 33,186 white children over seven years of age who had never been to school before were brought into our schools by this law. The passage of this Act and the far reaching results obtained because of it, has remedied one of the reasons why Mississippi was rated next to the last in 1918; namely, that a large number of our children never attended school. Although Mississippi was the last State in the Union to pass such a law, I feel that this Act is now one of the most popular educational measures on our statute books.

2. Increased Appropriation for Common Schools.—The common school appropriation was increased 60 per cent, and all the increase put into an equalizing or floating fund to be disbursed by the State Board of Education in such a manner as to equalize as nearly as possible, school terms and teachers' salaries throughout the State. During the strenuous times through which we have just

passed, it would have been impossible for many of the poorer counties to have operated their schools had it not been for this fund. The amounts received by the following counties from the State for common school purposes last session, as compared with the session before the meeting of the legislature will illustrate how this fund has helped:

	1918-1919	1920-1921
Benton.....	\$11,759.83	\$25,772.16
Leake.....	17,861.74	42,929.51
Amite.....	16,996.13	34,995.30

Last year, for the first time in the history of the State, was the State School Fund so divided as to give every child, no matter in what county it happened to live, an equal chance educationally on State funds. This manner of distribution was made possible by an amendment to the Constitution adopted by the people in November 1919.

3. Plans for School Buildings.—A small amount of money was appropriated in 1920 with which to have prepared plans, specifications, and blue prints for rural school houses so that children living in the country might have the benefit of school houses properly built, lighted, heated and ventilated. Hundreds of applications have come in from all over the State for plans, and it has been a real pleasure for this department to furnish these plans to trustees of rural schools. A detailed report of this matter will be found on another page.

4. Living Wage for Teachers.—The increase in the public school appropriation and the new method of disbursing same, has not only made possible longer school terms, more assistant teachers, and an increase of approximately 2,000 teachers to take care of the increased attendance because of the compulsory school law, but has also made possible better salaries for all the teachers. During and immediately following the great World War it was impossible to get a sufficient number of any kind of teachers at any price. There is still a shortage of the right kind of teachers, but with better salaries it will be possible, during the next few years, to raise the standard of the teaching profession in this State considerably. Better salaries must always precede by two or three years, better teachers, for it takes time to bring about a change.

5. Other Legislation.—It is not necessary to discuss in detail other school legislation passed in 1920, such as the laws effecting Vocational Education, Agricultural High Schools, Issuing of Bonds, etc. Taken altogether, the legislature, at its last session, did the big things for schools, and made possible the building of a school system in this State, within the next few years, that will guarantee to every child, no matter in what section of the State it may live, a chance to attend a real first class ten-grade, well organized standard school for six or seven months in the year.

RURAL SCHOOLS.

The backbone of the educational system of the State is the rural school where 75 per cent of our children get all the schooling they will ever get. The equalizing fund, and the compulsory school law have done more for the rural child by way of encouraging the establishment of better schools, than any other legislation we have ever had. During the last five years 1,500 small weak schools have

been abolished and 430 strong central schools established in their stead. Last session 1,800 trucks and wagons were busy every day transporting 35,000 children to consolidated schools doing from nine to twelve grades of approved work, and running at least seven months during the year. We have now altogether in the State 625 consolidated schools that have taken the places of 2,000 one and two teacher schools. This process of elimination of the weak inefficient schools is going on just as rapidly as road conditions will permit. I think it is safe to say that within the next five years practically every child in the country will have as good educational advantages through at least ten grades of work as the children of our cities and towns.

During the last year the Supervisor of High Schools has been advising the county superintendents and principals of rural schools for the purpose of bringing all rural high school work up to such a standard that it will be accepted at any school or college in the State. Five hundred and seventy-five rural high schools doing from one to three years of high school work are now on the approved list. Two hundred and twenty-five consolidated schools have as much as ten acres of land each, and 125, a home for the teachers. Twenty-seven consolidated schools have been approved by the Federal Government and are receiving financial help under the provisions of the Smith-Hughes law.

BIENNIAL REPORT OF J. T. CALHOUN.
STATE RURAL SCHOOL AGENT.

October 27th, 1921.

SUPERINTENDENT W. F. BOND,
Jackson, Mississippi.

Dear Sir:

As the State Rural School Supervisor, I herewith submit to you a brief report of the condition of these schools, and the changes that have taken place in them since my report to you two years ago.

Some of the Chief Elements of a Good Rural School.—A good school house, well lighted, heated, ventilated, and with the right kind of furnishing is one of the first requisites of a successful school anywhere and it is no less true in the country than in the city. Well educated teachers, professionally trained, of good moral character, and the right attitude toward the work, are also indispensable for the successful operation of schools, and in the rural districts these teachers must be rural minded. The right kind of pupils, from the right kinds of homes, must attend these schools. The patrons must be loyal in order that they may maintain the school adequately for a period long enough each session to permit the pupils to finish the work of their grades. The schools must be so organized as to permit the teachers to do their work under the best conditions possible. All these things are well understood, and every element of a successful school mentioned above is a necessary element of a successful rural school, and I shall state briefly in this report the progress that has been made along these lines in Mississippi within the last two years.

School Houses.—The last Legislature made a small appropriation for the purpose of assisting the State Department of Education in furnishing plans and specifications for rural school houses. You requested me to take charge of the preparation of these plans and I herewith report to you what I have done.

Since there was no provision that any of this fund should be used for paying architects' fees it became necessary for me to spend considerable time in preparing myself for drawing the floor plans of such school houses as, in my opinion, were most needed for rural communities. One of my first efforts was to secure from every State Department in the Union any bulletins that had been issued by these departments on rural school houses and grounds. From nearly every State I secured a supply of the bulletins and from the information gained therefrom I became convinced that our greatest need, at this time, was for plans of six-teacher schools or less. With this in mind I began the preparation of floor plans facing the four cardinal points of the compass because our best authorities agree that the plans should so be drawn as to permit the windows to be on the eastern or western side, preferably the eastern side. After doing this work, as best I could, I took these plans to Dr. F. B. Dresslar of George Peabody College, and secured his criticism and corrections. After this I took the floor plans to Mr. R. B. Spencer of Memphis, Tennessee, Mr. Emmett Hull, and Mr. N. W. Overstreet of Jackson, Mississippi, who very kindly, without any cost to the State, drew the plans and specifications. We are under lasting obligations to these men for these very great favors. The tracings made by the

architects were sent to the A. & M. College where the blue prints were made on the machine and returned to us for distribution. We have fourteen different kinds of plans with sizes ranging from one to six-teachers and have distributed one hundred and eighty-four. All these are for one story wooden buildings. We ought to have funds with which to employ architects to make a few plans for larger schools of brick which are frequently called for, but it is quite impossible to do this under the Act passed by the last legislature. Gradually our people are learning that the right kind of plans for school houses are of vital importance.

Well Educated Professionally Trained Teachers.—It is impossible for me to state definitely as to the improvement in the teaching force from the standpoint of education and training within the last two years, but I know that in those counties where the county superintendents take an active part in securing the teachers, an improvement has been made. The Normal College of Hattiesburg is doing a wonderful work in supplying better trained teachers in rural schools.

School Trustees.—The organization of the school trustees under your leadership has caused these trustees to make more intelligent selection of teachers and after all, the welfare of the school depends chiefly on the teacher.

Consolidation of Schools.—Two years ago I reported to you that 67 counties had some consolidated schools, now I am glad to report that in every county in Mississippi, except one, we find these schools. At that time I reported 353 consolidated schools, now there are more than 625. Two years ago there were 1,256 teachers in the consolidated schools, now there are 2,000. The number of pupils transported has increased from 15,829 to 35,000. In the consolidated schools at this time there are about 60,000 pupils, and in all of the schools high school work is being done,—one year of high school work in the smallest and four in the largest.

The cost of transportation for the last session was too much, but reports from the county superintendents indicate that for the present session there is a reduction in many cases from 25 to 50 per cent.

Teachers' Homes.—It gives me pleasure to report that there are now 125 teachers' homes in use in the State, nearly all of which are in the rural districts. This adds a great deal to the pleasure and profit of the teachers and to the welfare of the community.

REPORT OF SUPERVISOR OF NEGRO SCHOOLS

Below is a summary of the activities of the Department of the Supervisor of Negro Schools for the biennium.

JEANES INDUSTRIAL SUPERVISING TEACHERS.

During the year 1920 twenty-five Jeanes Industrial Supervising Teachers were employed by the Jeanes, the State and the County Funds. These twenty-five teachers represented as many different counties and were employed for term of from eight to eleven months, according to the wishes of the County Superintendents. Their duties were to supervise the industrial work that is being done in the schools of the counties, visiting each school in the county as often as possible, and also assisting the weak teachers in their class room work. They hold community meetings, encourage communities to build better schools and improve the sanitary conditions of the homes and of the schools, and build sanitary toilets for same. The result of last year's work is as follows:

Days worked by Agents, 3,652; Places visited by Agents, 2,277; Demonstrations Given, 2,471; Money Raised for School, \$10,548; Toilets Built, 147; People Reached, 59,381; Food Conserved, 222,012 Quarts.

The work for 1921 with these agents has been better than that of 1920, but as the year's work is not finished, we will not be able to report the exact amount of work done as of the previous year. Will say that these agents helped very materially in putting over the school building program during 1920 of \$500,000, and during the year 1921 of \$750,000. Not only are the agents doing the above mentioned work, but they are assisting in the conservation of food and feed stuffs that would otherwise go to waste on the average Negro farm. Their work is of inestimable value and has meant a great deal to these counties in which these agents happen to be working.

COUNTY TRAINING SCHOOLS.

We were able to maintain eleven County Training Schools during the year 1920, and during the year 1921 three more were added to that number. The County Training Schools are schools that are maintained jointly by the county public school authorities, the General Education Board, and the Slater Fund. They are maintained for the purpose of giving thorough training in the industries, both for the girls and for the boys. A high school department with teacher training course is maintained in order that the graduates may secure a county license and go into the county schools and carry the industrial idea to all of the schools of the county. We only maintain one training school in a county and where all of the Slater Board requirements are met and the local school authorities are interested in this kind of education for negroes. These schools have been a very great success and have meant a great deal to the counties in which they are located. There are more communities that are qualifying for schools of this kind now than we can possibly secure funds for.

CITY INDUSTRIAL SCHOOLS.

A limited amount of funds is given to the State from the Slater Board to assist in maintaining a Home Science Department for the girls in town and city schools. Wherever this money has been placed it has meant a great deal to the

development of the school interest and school program in that community. I would like to mention one, that of Hattiesburg. With a donation of \$300 for Home Science Department, the city authorities became very much interested in this work and seeing the wonderful help that it meant to the colored people the city authorities have erected at a cost of \$75,000, one of the most modern school plants, with an all-time Home Science teacher, that can be found in the State. This is a monument to the work and to the people of the city. This Slater Fund is given with the understanding that it will be withdrawn after a number of years and that the city authorities will take over the work the money to be used in other communities.

ROSENWALD FUND.

The Julius Rosenwald Fund allotted to Mississippi in 1920 was \$52,000, for the purpose of encouraging and assisting Negro rural communities in erecting modern, model school houses for their boys and girls. The assistance depends on the number of teachers in the school.

For a one-teacher school \$500 is given; two-teacher school, \$800; three-teacher school, \$1,000; four-teacher school, \$1,200; five-teacher school, \$1,400; six or more teacher school, \$1,600.

With this amount we were able to put across a \$500,000 building program during the year 1920. Much interest is being taken by the county superintendents and local school authorities in this work because it assures them that the school will have a better class of teachers and the community a better school spirit and more interest.

During the year 1921 the allotment was \$92,000 and all of it was taken up by the various communities of the State within thirty days after the allotment was announced. The building program for 1921 will exceed \$750,000 as a result of the above donation from the Rosenwald Fund. The interest in this work is exceedingly great and many county superintendents are now making great plans for the building program for next year. Ultimately all of the Negro schools in Mississippi will be in buildings that are modern and model. The white people are becoming more interested in the work and the county superintendents are contributing of the county funds in a great many instances to foster this work. We are very much pleased with the progress of the past two years and believe that there is a great deal of interest on the part of both races to better the educational program for the negroes and to give them that training that will ultimately make of them citizens that are worth while.

Respectfully submitted,

BURA HILBUN,
State Rural School Supervisor.

AGRICULTURAL HIGH SCHOOLS.

Fifty-two counties are contributing to the support of our 49 Agricultural High Schools that enrolled last year approximately 6,000 boys and girls, mostly from the rural districts. Of the 1,317 that graduated from these schools last spring it is safe to say that at least 1,000 of these would never have finished high school, had it not been for the Agricultural High Schools. Practically all the 6,000 enrolled were boarding students, thus showing that these schools are not local in character, but county-wide, and in some instances state-wide in their radius of influence. The boys are required to do five hours a week of work on the school farm and the girls are required to put in the same amount of time in the home science department. While the average cost of board was \$10.63 per month last session, several hundred students paid their way by working in the schools and on the school farm.

Twenty-four schools have been approved by the Federal Government and are receiving financial aid under the provision of the Smith-Hughes law.

The list of counties contributing to the support of Agricultural High Schools, is as follows:

COUNTY.	PRINCIPAL.	LOCATION.
Alcorn.....	E. E. Windes.....	Kossuth

The legislature, for the biennium just closed, made an appropriation of \$550,000 for the support of these schools, \$100,000 of which was to take care of the fall disbursement immediately preceding the meeting of the legislature in January 1921. Heretofore, these schools have run on credit for six months every other year. An appropriation, therefore, of \$450,000 for the next biennium will be sufficient.

VOCATIONAL EDUCATION.

Mississippi will receive from the Federal Government for the fiscal year ending June 30, 1922, \$68,940.34 for Vocational Education, to be used as follows: \$45,244.89 for salaries of Supervisors and teachers of agriculture; \$6,685.18 for salaries of teachers of trade and industrial subjects and home economics; \$7,009.27 for the training of teachers of these subjects. This fund increases annually until 1926, at which time we shall be receiving approximately \$130,000 each year. Under the provisions of the Smith-Hughes Law, the State must put up a dollar for every dollar of Federal money expended. Twenty-five Agriculture High Schools, eighteen Consolidated Schools, eight Town Schools, eighteen Negro Schools, and three State Colleges have received financial aid from this Fund during the biennium. All money received from the State and Federal Government for Vocational Education is disbursed by the State Board for Vocational Education. A biennial report to the legislature is being made by this Board in accordance with State Law.

VOCATIONAL TRAINING FOR CRIPPLES.

The Industrial Rehabilitation Act passed by Congress, June 2, 1920, provides a plan of co-operation between the Federal Government and the States to give such training to cripples over fourteen years of age, as will enable them to be self-supporting. The Federal law must be accepted by the State Legisla-

ture and provision made to have this work supervised in a satisfactory manner. Before Federal money can be utilized it must be matched dollar for dollar either by public or private funds. This is the first time in the history of the State that our cripples have had a chance, and it is to be hoped that the legislature will not let this opportunity pass to put this unfortunate class of our people on their feet. Under the Federal law, in those States where the legislature would not meet until January 1922, the Governor is given power to accept for the State, the provisions of this Act so as to make it operative in the States until the meeting of the legislature. The Act has therefore been accepted temporarily and has been in operation in this State, under difficulties, since the 5th of April 1921. The following is a report of what has been accomplished in that short space of time:

	MALE	FEMALE	TOTAL
Applications.....	153	25	178
Surveys.....	127	21	148

Operations secured for.....	7		7
Total who have received some benefit from Industrial Rehabilitation.....	56	15	71

HIGH SCHOOLS.

An accredited high school is one that meets the requirements of the State Accrediting Commission, and after inspection, has been approved by that Commission. A four-year high school may be approved for 15 or more units; a three-year high school for 12 units; a two-year high school for 8 units; and a one-year high school for 4 units.

The State Accrediting Commission is a standing Committee of the State Teachers' Association, consisting of representatives from each of the following colleges: The A. & M. College, Millsaps, Mississippi College, The Mississippi State College for Women, and the University of Mississippi; two high school men; and the State Supervisor of Secondary Schools, who is chairman of the Commission and has office in the State Department of Education, Jackson, Mississippi.

This Commission has adopted the following minimum standards which a four-year high school must meet before being accredited:

1. The first step toward having a school accredited is **formal action by the Board of Trustees, authorizing the Principal to organize and conduct it in conformity to required standards.**

Boards of trustees of schools of this rank are supposed to have regular meetings and to keep official minutes of proceedings; and in the minute book should be transcribed the resolution instructing the principal to make application for college affiliation. A transcript of this formal resolution should be sent to the State Accrediting Commission.

2. **A Thirty-two weeks session with recitation periods of forty-five minutes.** In the case of very small classes a forty-minute recitation period will be approved; laboratory periods must double the length of the recitation periods. Every school should aspire to have a term of thirty-six weeks.

3 **The High School Department must have a teaching force of not fewer than two teachers who give their whole time to high school instruction,** and the school as a whole must have not fewer than five teachers fully engaged in literary instruction. The principal may be counted as a high school teacher provided he actually does a full amount of teaching. No teacher shall be required to teach more than eight recitation periods per day. If other duties are assigned to the teacher, the number of daily class room periods should be reduced accordingly.

4. **All teachers must be properly qualified and efficient.** It is desirable that one or more shall hold a degree from a standard four-year college. By the words "properly qualified" is meant having an easy knowledge of the subject matter, and a knowledge of the best methods of teaching; it comprehends a scholarship the equivalent of at least two years of college work with special training in the subject to be taught.

5 **The completed course of study should insure for the pupil fifteen units of high school work,** the present requirement for college admission, but no school will be allowed more than SIXTEEN units. Colleges generally require that of the units presented 3 must be in English, $1\frac{1}{2}$ in algebra, 1 in plane geometry, and 2 in history. The other $7\frac{1}{2}$ units may be made up from any of the usual high school subjects. The term, **Unit**, means a successfully completed course of five recitations per week throughout the entire academic year of the school, and constitutes approximately one-fourth of a year's work. Note that the unit has both a time and a content value. Two periods of laboratory, drawing, or shop work will be measured as the equivalent of one recitation.

6. **The number of pupils in any one class shall not exceed thirty;** and in some subjects, as mathematics, sciences, or languages, should not exceed twenty.

7. **Only exceptional pupils shall be permitted to carry more than four major subjects per year.** A major subject is one which when completed, counts a unit toward graduation.

8. a. No entrance credit will be allowed on any science work **unless it is done according to the laboratory method, a record of which is kept in a note book and presented.** The note book must contain a list of the apparatus used by the individual pupil.

b. For September 1921, and September 1922, four units in English may be presented by schools on the All Southern List, and certain other schools recommended therefor by the colleges. Beginning with September 1923, four units in English will be recognized from those schools only which meet the following requirements:

1. A twelve-grade organization.
2. The course of study in English must be approved by the Commission from the seventh through the twelfth grades.

3. All English work must be in the hands of English teachers.
4. All English teachers must be graduates of approved four-year colleges.
5. No English teacher may be responsible for more than 750 pupil hours per week.
6. There must be a full library.
- c. Entrance credit in commercial subjects should be given on a proficiency rather than a time basis.

9. **Every high school must have a library.** This shall consist of a dictionary and encyclopedia of recent date, duplicate copies of the more generally used reference books, and an adequate number of carefully selected books and magazines of literary and historical value. The library should be placed and managed in such a way as to bring it into the use of all the school.

10. **Permanent records of students' attendance and scholarship must be neatly and accurately kept and properly safeguarded.** This is a standard that should be enforced in Mississippi high schools, as many of them have little or no system for making and keeping school records. It is recommended that the four-year record of each pupil be kept on one card in a filing case, or on one sheet in a loose-leaf ledger. No school should aspire to the accredited relationship that does not maintain a permanent system of records. One of the purposes of affiliation is to enable a pupil to pass readily from high school on certificate. The frequent changes in the principalship of our smaller schools make it imperative that a system of reports be maintained and proper provision made for safeguarding them. A custodian of records should be officially appointed by the Board of Trustees.

11. No student will be admitted to the standard colleges **upon presentation of diploma**, but on certification of units completed, signed by the principal or superintendent of the school where the work was done.

12. **A good intellectual and moral tone with stability of character should obtain in the school.** This is a standard which usually follows the enforcement of other standards, and is easily met when the school is continuously under qualified principals and teachers. To secure this desirable condition it is essential that the faculty have the undivided support of the school board in the maintenance of standards.

13 **An accredited school must make each year not later than February 15th, to the State Accrediting Commission, a prompt and full report on blank forms sent for the purpose, and submit at the same time a typewritten or printed course of study. All schools that do not comply to the letter with this section shall be dropped from the accredited list after two notices have been sent—the first to the superintendent, and the second to the President of the School Board.**

In addition to the above required standards, it is recommended by the Commission that schools should observe the following:

- a. No teacher should be required to teach more than six recitation periods per day. If other duties are assigned to the teacher, the number of daily class room periods should be reduced accordingly.
- b. The number of pupils per teacher based on attendance should not be excessive. Twenty-five pupils to the teacher is generally regarded as the maximum.

c. The location and construction of the building, the adaptation and arrangement of rooms, lighting, heating, ventilation, water supply, toilets, school furniture, and method of cleaning should be such as to insure best conditions for work and no less to promote the health and comfort of teachers and pupils.

REPORT OF STATE ACCREDITING COMMISSION.

The State Accrediting Commission has adopted the following requirements which must be met by any school desiring to be approved as a one-, two-, or three-year high school:

1. No high school work whatever will be recognized in a one-teacher school.
2. Only in exceptional cases will any high school work be recognized in a two-teacher school.
3. In a three-teacher school with less than 100 pupils four units of high school work may be approved when the other conditions below are met.
4. Only in exceptional cases will any high school work be recognized in a three-teacher school with more than 100 pupils.
5. Eight units of high school work may be recognized in a four-teacher school with less than 135 pupils when the other conditions given below are met.
6. Only in exceptional cases will more than four units of high school work be approved in a four-teacher school with more than 135 pupils.
7. Twelve units of high school work may be approved in a five-teacher school with less than 175 pupils when the other conditions are met.
8. Only in exceptional cases will more than eight units of high school work be approved in a five-teacher school of more than 175 pupils.
9. No high school work may be recognized when done by a teacher with less than two years of college training, or a Normal College diploma, or the equivalent.
10. The units referred to are standard units, as defined in Bulletin No. 23.
11. All standard units are based upon the standard school year of thirty-six weeks of five days each.
12. The minimum term in any approved high school whether four-, three-, two-, or one-year is thirty-two weeks.
13. Any school meeting the requirements otherwise but having less than the thirty-two weeks term may have its work approved provided the full time and content requirement for each unit is met; for example a seven months school

could do three units in mathematics in four sessions with forty-five minute period for the recitation meeting five times per week; of a six months school could do two units in mathematics in three sessions of forty-five minute recitation periods meeting five times per week.

14. The minimum recitation period in a three-year high school is forty-five minutes; in a two-year high school forty minutes; and in a one-year high school forty minutes.

15. The full teaching time of one teacher and one-half of the teaching time of a second teacher must be given to high school work in an approved three-year high school; the full time of one teacher, in a two-year high school; and one-half the full time of one teacher, in a one-year high school.

16. The number of standard units that must be offered for graduation in an approved three-year high school is twelve; in a two-year high school eight; in a one-year high school four.

17. The maximum number of daily recitations for a high school teacher in an approved three-year high school is eight; in a two-year high school nine; and in a one-year high school ten.

18. No school will be approved that does not have sufficient library and laboratory equipment to teach the courses offered in English, history, and science.

19. The number of pupils in any high school class shall not exceed thirty.

20. Only exceptional pupils shall be permitted to carry more than four standard units per year.

21. Permanent records of students' attendance and scholarship must be neatly and accurately kept and properly safeguarded.

22. An accredited school must make each year not later than February 15th to the State Accrediting Commission a prompt and full report on blank forms sent for that purpose, and submit at the same time a course of study.

TENTATIVE LIST OF ACCREDITED SCHOOLS OFFERING LESS THAN FIFTEEN APPROVED HIGH SCHOOL UNITS.

Graduates of three-year schools are approved for twelve units; two-year schools are approved for eight units; and one-year schools are approved for four units.

Adams County.

Three-year Schools—None.

Two-year Schools—Washington.

One-year Schools—Pine Ridge, Kingston.

Alcorn County.

Three-year Schools—None.

Two-year Schools—Kendrick, Farmington, New Hope, Mathis, Holly.

One-year Schools—Oakland, Fields, Hinkle, Jacinto, Bell, West Corinth, Glen, McGlathery.

Amite County.

Three-year Schools—None.

Two-year Schools—Gillsburg Consolidated, Mars Hill Consolidated, Gloster Separate, Oxford Consolidated.

One-year Schools—Homochitto Consolidated.

Attala County.

Three-year Schools—Sallis, McCool, McAdams A. H. S.
Two-year Schools—Ayers, Ethel South Union.

COLLEGES.

For the past several years practically every college in the state has had to turn away students on account of lack of room. The \$5,000,000 bond issue authorized at the last session of the legislature, part of which is to be used in building dormitories at our state colleges will, it is to be hoped, relieve this condition. The following table shows the enrollment at some of our colleges for the last biennium:

	Enrollment 1919-1920	Graduates 1919-1920	Enrollment 1920-1921	Graduates 1920-1921
University of Mississippi.....	630	111	621	122
Mississippi A. & M. College..	1653	88	1827	111

SUMMER SCHOOLS.

Training schools for teachers have been held for the last few years at the following places;

1920		1921	
WHITE	COLORED	WHITE	COLORED
Clinton	Alcorn College	Clinton	Port Gibson
University	Clarksdale	Meridian	Natchez
A. & M. College	Greenwood	Normal College	Hattiesburg
Meridian	Jackson College	Millsaps	Jackson
Normal College	Meridian	New Albany	Meridian
Poplarville	Tupelo	Aberdeen	Clarksdale
.....	Hattiesburg	College Hill	New Albany
.....			Cleveland
Pontotoc		Corinth	Senatobia

Booneville		Wesson	Mound Bayou
Grenada		Summit	Kosciusko
Slayden		Benton	Greenville
Meadville		Mize	Itta Bena
Mize		Mendenhall	Indianola
Mendenhall		Johnston	Charleston
.....		Meadville	

During the summer of 1920 approximately 2,500 white teachers were enrolled in summer schools. During the present summer there were more than 4,000, or approximately half of our white teachers doing summer work somewhere. This great increase is due to the fact that teachers have received better salaries, and are, therefore, better able to improve themselves professionally, and also to the further fact that the compulsory attendance law made it necessary to employ 1,500 more white teachers, and 500 more colored teachers during the last school term than was employed during the preceding term.

HEALTH EDUCATION.

Without expense to the State a division of Educational Hygiene of the State Department of Education was organized June 1, 1920. The division is made possible by the co-operation of the U. S. Interdepartmental Board, the University of Mississippi, the State Department of Education and the State Board of Health.

The Division of Educational Hygiene is concerned with the development and permanent maintenance of Departments of Hygiene, or courses in the principles and practices of hygiene, in all the educational institutions in the State, and includes all the activities and personnel in the State Department of Education that have to do with health teaching, physical education, and health care of the pupils of the State.

The work is in charge of a Director of Educational Hygiene, Dr. Helen Gage. An office is maintained in the State Department of Education, Jackson, Mississippi.

The general plan of organization is as follows:

1. To encourage in every way possible, and assist in the organization of departments of hygiene in the colleges of the State, such department to include if possible, at least—

- a. Adequate instruction in informational and applied hygiene;
- b. Health examinations of all students at least once a year with follow-up corrective and preventive work as far as possible;
- c. The development and maintenance of adequate departments of physical education.

2. To co-operate with the members of the Department of Education who have to do with the matter and methods of teaching in the high schools and elementary schools of the State, in securing effective teaching of Hygiene and Physical Education in the elementary and secondary schools of the State.

3. To co-operate with other agencies in the State in the development of a better health consciousness among the people of the State.

Work Accomplished.**1. Informational Hygiene: Health Lectures:**

The Director has given many health lectures to audiences of many types—college students, high school students and teachers, elementary schools, meetings of teachers, of home demonstration agents, and of women's clubs, short courses for club girls, local and state parent-teachers' associations, and various sections of the State Teachers' Association.

During the summer of 1920 a series of health talks and round table conferences were conducted at the Summer Normals for white teachers. Topics covered were: Personal Hygiene, School Hygiene and Sanitation, Social Relationships. During the summer of 1921 health lectures were given at White Normals either by the Director of Educational Hygiene, Director of the Bureau of Child Welfare, or the physician in charge of the health examinations at the Normal.

2. Hygiene Syllabi: Two syllabi for the teaching of Hygiene have been prepared:

a. A syllabus for the teaching of personal hygiene in connection with courses in physiology and biology given in the high schools of the State.

b. A syllabus for the teaching of hygiene in the Negro Summer Normal (in 1921). This course was required of all teachers attending the Normals, approximately 3,000.

3. A week's course in hygiene (2 hours per day) was given at the Summer Normal at Millsaps (1921). This course was arranged as follows:

1 hour per day (five lectures): Subjects, Personal Hygiene, School Hygiene, and Sex Education in the School, given by the Director.

1 hour per day (five lectures): Public Health Work in Mississippi as related to the schools. Lectures given by the various members of the State Department of Health.

4. A campaign for encouraging the wearing of sensible shoes (low heel broad toe, straight last) has been conducted through the State with the cooperation of the State Supervisor of Home Economics and the Home Demonstration agents. Lectures have been given, a shoe exhibit and educational posters are loaned from the department and the film, "Foot Follies" has been kept in circulation through the State for the past six months.

5. Sanitary Standards for Rural Schools:

A sanitary standard for the rural schools in Mississippi has been carefully worked out and a questionnaire prepared designed to give the information needed in order to grade the schools according to the standard. This standard is endorsed by the State Department of Education and the State Board of Health.

6. Modern Health Crusade: As a means of encouraging the formation of health habits, the use of the Modern Health Crusade is recommended in the 4th and 5th grades of the schools of the State.

2. Health Examinations and Physical Education:

1. Health Examinations have been given by the Director to all girls enrolling at the University and the State Normal College, during the years 1920-1921. State Normal College to date, 858; University, 214.

2. The Director of the Division of Educational Hygiene and the Director of the Bureau of Child Welfare co-operated in working out a plan whereby all teachers attending Summer Normals were given an opportunity for health examinations. Examination blanks were prepared and health certificates were issued to those qualifying for them. Three Child Welfare Units were assigned to this work. The Director assisted with these examinations at two of the Normals. ———teachers were examined and———health certificates were issued.

3. Dr. Eva M. Blake of the National Y. W. C. A. spent two weeks in Mississippi in November 1920, at the invitation of the Director for work in the Departments of Physical Education in the Colleges. She visited five colleges while in the State, giving inspirational health talks and holding conference with the teachers of physical training, giving practical demonstrations of methods of physical examinations for posture, orthopedic defects, etc., with corrective exercises as indicated.

4. A physical education bulletin was prepared at the request of the State Board of Education, by the Director of Physical Education at the Mississippi State Normal College, for use in the Summer Normals (1921). This bulletin was edited and a health chapter arranged and added by the Director of the Division of Hygiene.

3. Sex Education in the Schools: As a general policy the Department recommends that Sex Education be given in the schools to boys and girls separately in connection with courses already in the curriculum, such as biology, physiology, general science and home economics, in case the teacher in charge of a class is interested and competent.

The matter of Sex Education in the schools was presented at the Principal's Section and the Home Economics' Section of the State Teachers' Association. At the Principals' Section a committee of ten was appointed to take the matter under consideration. The report of this committee will be given at the next annual meeting of the State Teachers' Association.

The Director has received many invitations to give social hygiene talks to girls in the high schools of the State. These invitations have been accepted as far as time permitted.

SUGGESTED COURSE OF STUDY FOR THE PUBLIC SCHOOLS OF MISSISSIPPI.

It is the aim of the Department of Education to fit this Course of Study to the rural school having a minimum term of six months.

First Year.

Child's World Primer—First three months. (Teacher should have copy of Child's World Reader's Manual.)

Child's World First Reader—Second three months. Follow with supplementary first reader, if time permits.

Language—Story telling, memorizing, picture study, dramatization, and correction of common errors of speech.

Oral and Written Number Work—Counting, reading and writing numbers to one hundred. Combinations to ten in addition and subtraction.

Writing—On table or board. Care to be taken that first efforts be round and full, using the whole arm as much as possible. Graves' Writing Book No. 1 is to be used during the last two months.

Spelling—Oral and written; words to be selected by the teacher from the reading lessons.

Physical Training.

Second Year.

Child's World Second Reader—First three months. Follow with a supplementary reader.

Language—Continue work of first grade; dictation, capitals, common errors corrected.

Spelling—Oral and written, words to be selected by the teacher from the reading lessons. Use Blue Back Spelling Blanks.

Oral and Written Number Work—The forty-five addition combinations, and the addition, subtraction, multiplication, and division facts up to thirty-six should be taught well. Introduce fractions.

Graves' Writing Book, No. 2.

Physical Training.

Third Year.

Child's World Third Reader—First three months. Follow with a supplementary reader.

Language—Continue work of first two grades, letter writing, ordinary capitals and punctuation, correction of common errors.

McFadden-Ferguson Language Series, Book 1—in hands of teacher

Jones' Keep Well Stories—First three months. Follow with a Home Geography, Graves' Writing Book No. 3.

Hunt's Progressive Speller—Part 1, Section 1. Blue Back Spelling Blanks.

Colaw, Duke and Powers' Elementary Arithmetic—through page 148.

Physical Training.

Fourth Year.

Child's World Fourth Reader—First three months. Follow with a supplementary reader.

Graves' Writing Book No. 4.

Hunt's Progressive Speller, Section 2, Part 1. Blue Back Spelling Blanks.

Colaw, Duke and Powers' Elementary Arithmetic—Completed.

Brigham and McFarlane's Essentials of Geography, Book 1.—The sections should be taught in the following order: 1-65; 78-83; 130-162; 96-129; 84-96.
 McFadden-Ferguson's Language Series, Book 1—Completed.
 Physical Training—Follow work planned in Winslow's Healthy Living, Book 1, pages 228-242.

Fifth Year.

Child's World Fifth Reader.
 Winslow's Healthy Living, Book 1.
 Estill's Beginners' History of Our Country.

NOTE—To prevent the work of this grade from being too heavy, it will be advisable to teach the reading, hygiene and history as follows: Reading two days per week, and hygiene three days per week for the first three months. History three days per week and hygiene two days per week during the second three months.

Hunt's Progressive Speller, Part 1, Section 3. Blue Back Spelling Blanks.
 Graves' Writing Book No. 5.
 Colaw, Duke and Powers' Practical Arithmetic—to page 120.
 Brigham and McFarlane's Essentials of Geography, Book 1.—The sections should be taught in the following order: 170-183; 163-169; 193-255; 184-192; 256-311; 66-77.
 McFadden and Ferguson's Language Series, Book 2.—To section 90, page 143.
 Webster's Dictionary, Shorter Course.
 Physical Training—(Follow work planned in Winslow's Healthy Living. Book 1, pages 228-242.)

Sixth Year.

Literary World Sixth Reader.
 Fant's Mississippi History.
 Burkett, Stevens and Hill's Agriculture—Revised.

NOTE—To prevent the work of this grade from being too heavy it will be advisable to teach the reading, agriculture and Mississippi History as follows: Mississippi History three days per week and Agriculture two days per week for the first four months; Agriculture three days per week and reading two days per week for the next two months.

Graves' Writing Book No. 6.
 Hunt's Progressive Speller, Part 2, Section 1. Blue Back Spelling Blanks.
 Colaw, Duke and Powers' Practical Arithmetic—Pages 121-242.
 Brigham and McFarlane's Essentials of Geography, Book 2. The sections should be taught in the following order: 1-76; 151-174; The Mississippi Supplement: 77-150; 258-282.
 McFadden and Ferguson's Language Series, Book 2—Completed.
 Physical Training—(Follow work planned in Winslow's Healthy Living, Book 2, pp. 366-390.)

Seventh Year.

Literary World Seventh Reader.
 Winslow's Healthy Living, Book 2.
 Hunt's Progressive Speller, Part 2, Section 2; Blue Back Spelling Blanks.

NOTE—To prevent the work of this grade from being too heavy it will be advisable to teach the reading, hygiene and spelling as follows: Hygiene three times per week throughout the session; Reading twice per week the first two months, and Spelling twice per week the remaining four months.

Graves' Writing Book No. 7.
 Colaw, Duke and Powers' Practical Arithmetic—Completed.
 Mace-Petrie's American History—Completed.
 Brigham and McFarlane's Essentials of Geography—Completed.
 McFadden and Ferguson's Composition and Grammar, Book 3—To section 99, page 192.
 Physical Training—(Follow work planned in Winslow's Healthy Living, Book 2, pages 366-390.)

Eighth Year.

Literary World Eighth Reader—First three months.
 Lapp's Civics—Last three months.
 Graves' Writing Book No. 8.
 Hunt's Progressive Speller, Part 2, Section 3. Blue Back Spelling Blanks.
 McFadden and Ferguson's Composition and Grammar, Book 3—Completed.
 Nolan's One Hundred Lessons in Agriculture—Completed.
 Physical Training.

First Year High School.

Wentworth-Smith's School Algebra, Book 1; to Quadratics—(Required.)
 Caldwell and Eikenberry's General Science—Completed with laboratory manual experiments. (Required.)
 English—(Required.) *a.* Grammar and Composition three periods per week using Kern and Noble's First Course in English or Brooke's Composition, Book 1, or other suitable text. *b.* Literature two periods per week. Elson's Grammar School Reader, Book 4, and Treasure Island. (Adopted texts.)
 (One of the following subjects should be used:)
 Ritchie's Sanitation and Physiology.—(Optional.)
 Smith's or Pearson's First Year Latin.—(Optional.)
 Botsford's or Myers' General History.—(Optional.)
 Greer's Cooking or Kinne and Cooley's Shelter and Clothing.—(Optional.)

NOTE—No attempt should be made to complete a unit of high school work if the term is less than eight months. (A unit of high school work is any successfully completed course of five recitations per week for thirty-six weeks with a recitation period not less than forty minutes and constituting approximately one-fourth a year's work. Incomplete units should be completed the following year. Only four subjects per year should be taken by a high school pupil.) Any text book may be used in the high school subjects, except in Algebra, General Science and Literature.

Second Year High School.

Wentworth-Smith's School Algebra, Book 1—Completed. (Required.)
 English—(Required.) *a.* Grammar and Composition, two periods per week, using Brooks' Composition Book 2, or any other suitable text. *b.* Literature three periods per week; Shakespeare's Julius Caesar and Selected Poems (Adopted texts).
 Two of the following subjects should be required:
 Smith's or Pearson's Latin.—(Optional.)
 James and Sanford's American History or Cousin and Hill's American History. (Optional.)
 Garner's Government of the United States.—(Optional.)
 Greer's Cooking or Kinne and Cooley's Shelter and Clothing.—(Optional.)
 Walker's Caesar.—(Optional.)

LETTER OF TRANSMITTAL

State of Mississippi,
Department of Education.

Jackson, Mississippi, September 1, 1923.

To the Legislature of the State of Mississippi:

Gentlemen:

In accordance with the requirements of the law, I herewith submit to your honorable body the biennial report of the Superintendent of Public Education for the scholastic years 1921-1922 and 1922-1923.

Very respectfully,

W. F. BOND,

State Superintendent of Public Education.

DEPARTMENT OF EDUCATION.

W. F. Bond.....Superintendent
 Mrs. Gerald James.....Private Secretary
 J. W. Broom.....Assistant Superintendent
 Patti Batson Broom.....Chief Clerk
 Miss Carolyn Bufkin.....Stenographer
 J. T. Calhoun.....Supervisor Rural Schools
 Bura Hilbun.....Supervisor of Negro Schools
 Miss Mary Betsy Maltby.....Secretary
 Claude Bennett.....Supervisor High Schools
 Miss Eugenia Halbert.....Stenographer
 F. J. Hubbard.....Director Vocational Education
 D. L. Williams.....Supervisor Vocational Agriculture
 Miss Esther Rogers.....Supervisor Home Economics
 P. H. Easom.....Supervisor Vocational Agriculture
 Sam E. Woods.....Supervisor Industrial Rehabilitation
 Mrs. Mary Baker.....Assistant Supervisor Industrial Rehabilitation
 Mrs. Guy Sample.....Secretary
 Mrs. C. H. McCall.....Stenographer

STATE BOARD OF EDUCATION

W. F. Bond.....President
 Jos. W. Power.....Secretary of State
 Frank Roberson—Clayton Potter.....Attorney-General
 A. G. Gainey.....Executive Secretary
 Miss Anabel Power.....Stenographer

STATE BOARD OF EXAMINERS

G. W. Huddleston, President
 Susie M. Bond, Secretary
 B. T. Schumpert
 O. A. Shaw

VOCATIONAL EDUCATION BOARD

W. F. Bond, President, Jackson
 J. T. Calhoun, Jackson
 H. M. Ivy, Jackson
 Bura Hilbun, Jackson

TRUSTEES OF THE UNIVERSITY OF MISSISSIPPI, MISSISSIPPI
 STATE COLLEGE FOR WOMEN, AGRICULTURAL AND
 MECHANICAL COLLEGE, AND ALCORN AGRICUL-
 TURAL AND MECHANICAL COLLEGE

Gov. Lee M. Russell.....President

Yazoo	T. J. White	Yazoo City

RECOMMENDATIONS

1. There should be an increase in the common school appropriation for the following reasons: (a) A state appropriation enables every rural school to share in the taxes derived from railroads and other property located in our cities and towns. (b) The cities and towns are kept up very largely by trade from the rural districts. (c) Good rural schools are fundamental to our general welfare in Mississippi.

2. The school code prepared by the attorney general and the state superintendent of education two years ago should be enacted into law with such amendments and changes as the legislative committees and the legislature see fit to make. This code passed the senate in 1922 with only three votes against it, and failed of passage in the house because of lack of time for consideration.

3. The office of County Superintendent of Education should be put on a professional, rather than a political basis. Counties should have the privilege of changing the method of selecting their county superintendent. In every state now bordering on Mississippi the county superintendent is selected by a board elected by the people. This board acts in the same manner for the county schools as the city and town boards of trustees for the town schools, with the exception that the local board of trustees of county schools has a voice in the selection of teachers.

4. The county superintendent of education should take office on June 1st, instead of January 1st. Under the present system every fourth year there is considerable loss of motion due to the fact that one county superintendent contracts with the teachers and starts the schools, and another, taking office in January, is supposed to pay the bills and close the schools.

5. The educational qualifications of those who would be county superintendents of education should be raised. The county superintendents of the state have not only almost complete supervision of the expenditure of millions of dollars spent on our schools, but they are also responsible in a large way for the educational welfare of our children. Certainly one with so much authority should be well qualified.

6. Before the standard of teachers can be raised very much, a new certification law is necessary. The present law is entirely out of date and not workable.

7. The State Institutions should be on a millage basis and under a constitutional board of trustees appointed in such a way as to remove these Institutions, as far as possible, from political interference.

8. The State Text Book Law should be amended in the following particulars:

(a) The governor should not name the commission.

(b) The commission should be appointed at least a year before the adoption is to be made so that the adoption could be made at least six months before the books are to be delivered.

(c) The commission should have authority by unanimous vote to adopt any text for a shorter period than five years.

(d) There should be at least one expert primary teacher and a successful teacher of elementary work on the commission.

(e) All the consolidated schools and the small town schools should use the same high school texts.

9. Every county superintendent should be allowed some office help at least during the school term. Expenses incurred visiting schools should be borne by the county.

10. There should be one or more supervising teachers in every county.

11. There should be increased facilities for the establishing of libraries in rural schools.

12. Whatever of the county school fund is to be disbursed for the aid of county school buildings, should be disbursed in the spring and not in the fall as our schools now operate in the winter and not in the summer.

13. There should be a state supervisor of primary work. One-half of the total number of pupils enrolled in our public schools are in the first four grades. A state supervisor, therefore, for these grades would reach every year half of our school children at the very time when they are most in need of help.

14. The various counties should be given the privilege of employing a county supervisor of primary work.

15. The appropriation for summer normals for the training of teachers should be \$7500.00 annually.

16. For several years the General Education Board of New York City has paid the entire expenses of a state supervisor of rural schools, a supervisor of negro schools, a high school supervisor and two stenographers. The fund for the support of the high school supervisor and his stenographer will be withdrawn after June, 1925. It will, therefore, be necessary, if this work is to be continued after that time, for the Legislature of 1924 to make sufficient appropriation to carry it on. I urge that this work be provided for.

17. Some system should be worked out that will require every county to aid in a financial way in the education of its children.

18. The educable age should be from six to eighteen, instead of five to twenty-one as it now is.

19. A small appropriation should be made to make possible an adequate supply of plans for school buildings and teachers homes for rural schools.

20. School authorities should be required to make their school buildings safe for the children in case of fire.

NARRATIVE REPORT OF THE STATE SUPERINTENDENT OF EDUCATION

FOREWORD.

During the last two years the work of building a school system in the state that will guarantee the advantages of a good school within the reach of the home of every child has gone steadily forward. In fact, there is to-day, by far the greatest interest in the education of the children we have ever had. County and district levies have been increased, the school term lengthened, better teachers employed, more grades added, and the work standardized in most of the counties of the state. Every county now has a levy ranging from one mill in a few counties to six and one-half mills in Copiah County. District levies range all the way from two or three mills to as high as thirty mills.

RURAL SCHOOLS.

We now have 751 Consolidated schools with transportation for all children living two miles or more from the school building, and we are building these strong central schools at the rate of, approximately, 100 a year.

There are, in the state today, 226 teacher's homes, furnished, rent free, to the teachers. These homes are built mostly in connection with the consolidated schools on land belonging to the school district.

Practically all of the high school work in these schools is of standard grade. All consolidated schools carry from one to four years of accredited high school work. Forty-seven of these schools have been approved by the Federal Government as qualified to do Vocational work in Agriculture and are receiving Federal Aid.

A statement in detail on consolidated schools is given in the latter part of this report.

AGRICULTURAL HIGH SCHOOLS.

Fifty counties are contributing to the support of our 48 Agricultural High Schools that enrolled last year, approximately 6,000 boys and girls, mostly from the rural districts. Of the 1400 that graduated from these schools last spring it is safe to say that, at least, 1,000 of these would never have finished high school, had it not been for the Agricultural High Schools. Practically, all the 6,000 enrolled were boarding students, thus showing that these schools are not local in character, but county-wide, and in some instances state-wide in their radius of influence. The boys are required to do five hours a week of work on the school farm and the girls are required to put in the same amount of time in the home science department. While the average cost of board was approximately \$10 per month last session, several hundred students paid their way by working in the schools and on the school farm.

Twenty-three schools have been approved by the Federal Government and are receiving financial aid under the provision of the Smith-Hughes law.

The list of counties contributing to the support of Agricultural High Schools is as follows:

MISSISSIPPI AGRICULTURAL HIGH SCHOOLS.

County	Principal	Location
Alcorn	E. Strickland	Kossuth
Amite	H. F. Stout	Liberty
Attala	H. A. Pollard	McAdams
Calhoun	C. E. Lindsey	Derma
Chickasaw	Jeva Winter	Buena Vista
Choctaw	T. A. Patterson	Weir

Yazoo	G. H. Brunson	Benton

VOCATIONAL EDUCATION.

Vocational Education in Mississippi is contributing substantially to the material, social and educational welfare of the State.

In 1922 the boys enrolled in courses of Vocational Agriculture in the state made a total net profit of \$82,671.25 from their agricultural project work. This profit alone represents 126½ per cent return on the total expenditure of State money for all three forms of vocational education during the same year. During 1922 and 1923 the Smith-Hughes Agricultural Schools gave definite and specific help to 3768 individual farmers on many different kinds of farm problems. This help was not only a great aid to the farmers, but it furnished excellent means for giving first hand practical training to the agricultural pupils.

The Vocational schools are also rendering a valuable service to many people out of school by conducting part-time and evening courses. During the sessions of 1922-1923 there were 1016 adults who attended such courses in the state, and indications are that this phase of vocational education will have a very rapid growth in the immediate future. There are one-hundred forty-seven vocational schools distributed over sixty-five counties of state, at the present time receiving State and Federal aid. Under the provision of the Smith-Hughes law, Mississippi will receive from the Federal Government for Vocational Education, \$103,561.05 for the fiscal year ending June 30, 1925, and \$120,871.42 for the year ending June 30, 1926. The federal act provides that the state must put up a dollar for every dollar of Federal money expended. All money received from State and Federal government for vocational education is disbursed by the State Board for Vocational Education. This board is making a biennial report to the Legislature on the work in Vocational Education in accordance with State Law.

VOCATIONAL REHABILITATION OF CIVILIANS.

Vocational Rehabilitation of Civilians means the rendering of physically handicapped citizens fit to engage in a remunerative occupation. It has no reference to the work of rehabilitating disabled soldiers as carried on by the United States Veterans Bureau, but it embraces that work carried on by the state Vocational Board in rehabilitating disabled citizens—crippled men, women, boys and girls who are over sixteen years of age.

Civilian Rehabilitation gives the cripple a chance, makes the dependent citizen independent, converts the non-producer into a producer and changes heartache and hunger into happiness and contentment—it is, therefore, a highly constructive work.

Under the provision of the Federal Industrial Rehabilitation law, Mississippi receives an annual Federal allotment of \$17,009.27 for civilian rehabilitation provided, the state appropriates an equal sum for the same purpose. The 1922 State Legislature passed an act accepting the provision of the Federal Act and making the State Vocational Board responsible for administering both laws in the state.

Since that time free surgical treatment has been secured for one hundred ten physically disabled persons four hundred twenty have been given vocational training, and one hundred seventy-one have been dismissed as completely rehabilitated. Every one of these rehabilitated cases was, either partially or wholly dependent upon relatives or public charity when first located by representatives of the State Vocational Board, but every one of them is now earning his own livelihood and many are saving money and in line for further promotion.

That the expenditures for civilian rehabilitation yields big financial return is evidenced by the fact that the increased earnings of these one hundred seventy-one rehabilitated people for only one year, greatly exceed the total amount of state and federal funds expended for all rehabilitation work during the past two years.

A biennial report on the work of Civilian Rehabilitation is, also, being made to the Legislature by the State Vocational Board in accordance with State Law.

ACCREDITED HIGH SCHOOLS

An accredited high school is one that meets the requirements of the State Accrediting Commission and, after inspection, has been approved by that Commission. A four-year high school may be approved for 15 or more units; a three-year high school for 12 to 14½ units; a two-year high school for 8 to 11½ units; and a one-year high school for 4 to 7½ units.

The State Accrediting Commission is a standing Committee of the State Teachers' Association, consisting of representatives from each of the following colleges: The A. & M. College, Millsaps College, Mississippi College, The Mississippi State College for Women, the Normal College, and the University of Mississippi; three high school men; and the State Supervisor of Secondary Schools, who is chairman of the Commission and has his office in the State Department of Education, Jackson, Mississippi.

This Commission has adopted the following minimum standards which a four-year high school must meet before being accredited.

1. The first step toward having a school accredited is **formal action by the board of trustees authorizing the principal to organize and conduct it in conformity to required standards.**

Boards of trustees of schools of this rank are supposed to have regular meetings and to keep official minutes of proceedings, and in the minute book should be transcribed the resolution instructing the principal to make application for approval. A transcript of this formal resolution should be sent to the State Accrediting Commission.

2. **A Thirty-two weeks session with recitation periods of forty-five minutes.** In the case of very small classes a forty-minute recitation period will be approved; laboratory periods must double the length of the recitation periods. Every school should have a term of thirty-six weeks or more.

3. The high school department must have a teaching force of not fewer than two teachers who give their whole time to high school instruction, and the school as a whole must have not fewer than six teachers fully engaged in literary instruction. The principal may be counted as a high school teacher provided he actually does a full amount of teaching. No teacher shall be required to teach more than eight recitation periods per day. If other duties are assigned to the teacher, the number of daily class room periods should be reduced accordingly.

4. All teachers must be properly qualified and efficient. One or more shall hold a degree from an approved four-year college. By the words "properly qualified" is meant having an easy knowledge of the subject matter, and a knowledge of the best methods of teaching; it comprehends a scholarship the equivalent of at least two years of college work with special training in the subject to be taught.

5. The completed course of study should insure for the pupil fifteen units of high school work, the present requirement for college admission. (Beginning in 1925 the course of study must insure sixteen units, four of which must be English. This requirement applies to the school and not to the pupil). Colleges generally require for entrance three units in English, one and one-half in algebra, one in plane geometry and two in history. (For table of entrance requirements see Bulletin No. 29). The other units may be made up from any of the usual high school subjects. (See Bulletin No. 29). The term UNIT means a successfully completed course of five recitations per week throughout the school year and constitutes approximately one-fourth of a year's work. Note that the unit has both a time and content value. Two periods of laboratory, drawing or shop work will be measured as equivalent to one recitation.

Any approved four year high school that graduates a pupil with less than fifteen approved units will be dropped to the three year class.

Beginning with the session of 1924-25 credit for less than two units in a modern language will not be recognized.

6. The number of pupils in any one class section shall not exceed thirty; and in some subjects, as mathematics, sciences, or languages, should not exceed twenty.

7. Only exceptional pupils shall be permitted to carry more than four major subjects per year. A major subject is one which when completed counts a unit toward graduation.

8. a. No credit will be allowed on any science work unless it is done according to the Laboratory method, a record of which is kept in a note book and presented. The note book must contain a list of the apparatus used by the individual pupil.

b. Beginning with September, 1923, four units in English will be recognized from those schools only which meet the following requirements:

1. A twelve-grade organization.

2. The course of study in English must be approved by the Commission from the seventh through the twelfth grade.

3. All English work must be in the hands of English teachers.

4. All English teachers must be graduates of approved four-year colleges, or have training in English equivalent thereto.

5. No English teacher may be responsible for more than 750 pupil hours per week.

6. There must be a full library.

c. Entrance credit in commercial subjects should be given on a proficiency rather than a time basis. (See Bulletin No. 29).

d. Work done in summer schools must equal in quality and quantity that of the regular school term. The qualifications of the teachers, the equipment, and the standards enforced must be the same.

A maximum of one and one-half units in new work can be secured in a summer session of not less than eleven weeks.

In case of review work where the failure has been for one term only, two units can be made up during a summer session of eleven weeks.

10. **Permanent records of students' attendance and scholarship must be neatly and accurately kept and properly safeguarded.**

A school which accepts pupils from a non-approved school without examination or from an approved school without a transcript of his credits from the former school or an examination covering them will be dropped from the approved list. (Transcript blanks may be obtained on request from the State Dept. of Education).

It is recommended that the four year record of each pupil be kept on one card in a filing case or on one sheet in a loose leaf ledger. No school should aspire to the accredited relationship that does not maintain a permanent system of records. The frequent changes of the principalship of our schools make it imperative that a system of reports be maintained and proper provision made for safeguarding them. A custodian of records should be officially appointed by the Board of Trustees.

11. No student will be admitted to the standard colleges **upon presentation of diploma**, but on certification of units completed, signed by the principal or superintendent of the school where the work was done.

12. **A good intellectual and moral tone with stability of character should be obtained in the school.** This is a standard which usually follows the enforcement of other standards, and is easily met when the school is continuously under qualified principals and teachers. To secure this desirable condition it is essential that the faculty have the undivided support of the school board in the maintenance of standards.

13. An accredited school must make each year not later than November 1st, to the state accrediting commission, a prompt and full report on blank forms sent for the purpose, and submit at the same time a type-written or printed course of study..... All schools that do not comply to the letter with this section shall be dropped from the accredited list after two notices have been sent—the first to the superintendent, and the second to the president of the school board.

14. Probationary Approval.—A school which otherwise is meeting the requirements but has not been officially inspected may be placed on a probationary list and its graduates accepted by the colleges without examinations until such school has been officially inspected. The records made in college by the graduates of such schools shall be taken in consideration in determining the school's fitness for affiliation.

In addition to the above required standards, it is recommended by the Commission that schools should observe the following:

(a) No teacher should be required to teach more than six recitation periods per day. If other duties are assigned to the teacher, the number of daily class room periods should be reduced accordingly.

(b) The number of pupils per teacher based on attendance should not be excessive. Twenty-five pupils to the teacher is generally regarded as the maximum.

(c) The location and construction of the building, the adaptation and arrangement of rooms, lighting, heating, ventilation, water supply, toilets, school furniture and method of cleaning should be such as to insure best conditions for work and no less to promote the health and comfort of teachers and pupils.

REPORT STATE ACCREDITING COMMISSION FOR 1923.

No. old schools applying for approval as 4-yr. schools	183
No. new schools applying for approval as 4-yr. schools	74
Total	257
Old schools approved for four years of high school	176
New schools approved for four years of high school	25
Old schools restored to four year list	4
Total schools on four-year list for 1923	205
New schools given probationary approval (These schools are apparently meeting all requirements but have not been officially inspected)	21
New schools given lower classification than four years	28
Old schools given lower classification than four years	3
Total	52
Schools applying for less than four years rating	506

SUMMARY.

Schools approved for four years of high school work	205
Schools approved for 0, 1, 2, or 3 years of high school work	506
Total applications handled by the Commission	711
Total number schools inspected	106

APPROVED FOUR-YEAR HIGH SCHOOLS

REQUIREMENTS FOR APPROVAL AS A ONE, TWO, OR THREE-YEAR HIGH SCHOOL, 1923

The State Accrediting Commission has adopted the following requirements which must be met by any school desiring to be approved as a one, two or three year high school:

1. No high school work whatever will be recognized in a one-teacher school.
2. Only in exceptional cases will any high school work be recognized in a two-teacher school.
3. In a three-teacher school with less than 100 pupils four units of high school work may be approved when the other conditions below are met.
4. Only in exceptional cases will any high school work be recognized in a three-teacher school with more than 100 pupils.
5. Eight units of high school work may be recognized in a four-teacher school with less than 135 pupils when the other conditions given below are met.
6. Only in exceptional cases will more than four units of high school work be approved in a four-teacher school with more than 135 pupils.
7. Twelve units of high school work may be approved in a five-teacher school with less than 175 pupils when the other conditions given below are met.
8. Only in exceptional cases will more than eight units of high school work be approved in a five teacher school of more than 175 pupils.
9. No high school work will be recognized when done by a teacher with less than two years of college training, or a Normal College diploma, or the equivalent.
10. The units referred to are standard units, as defined in Bulletin No. 29.
11. All standard units are based upon the standard school year of thirty-six weeks of five days each.
12. The minimum term in any approved high school whether four, three, two, or one-year is thirty-two weeks.
13. Any school meeting the requirements otherwise but having less than thirty-two weeks term may have its work approved provided the full time and content requirement for each unit is met; for example a seven months school could do three units in mathematics in four sessions with forty-five minute periods for the recitation meeting five times per week; or a six months school could do two units in mathematics in three sessions with forty-five minute recitation periods meeting five times per week.

14. The minimum recitation period in a three-year high school is forty-five minutes; in a two-year high school forty minutes; and in a one-year high school forty minutes.

15. The full teaching time of one teacher and one-half of the teaching time of a second teacher must be given to high school work in an approved three-year high school; the full time of one teacher, in a two-year high school; and one-half the full time of one teacher in a one-year high school.

16. The number of standard units that must be offered for graduation in an approved three-year high school is twelve; in a two-year high school eight; in a one-year high school four.

17. The maximum number of daily recitations for a high school teacher in an approved two or three year high school is eight; in a one-year high school ten.

18. No school will be approved that does not have sufficient library and laboratory equipment to teach the courses offered in English, history, and science.

19. The number of pupils in any high school class shall not exceed thirty.

20. Only exceptional pupils shall be permitted to carry more than four standard units per year.

21. Permanent records of student's attendance and scholarship must be neatly and accurately kept and properly safeguarded.

22. An accredited school must make each year not later than November 1st, to the State Accrediting Commission a prompt and full report on blank forms sent for that purpose, and submit at the same time a course of study.

RATING OF NON-AFFILIATED HIGH SCHOOLS OF MISSISSIPPI

Secure from your local dealer or State Depository the following books which were recently adopted for use in all schools for a period of five years:

	Retail Price
Trafton, Science for Home and Community	\$1.39
Stone-Millis, Elementary Algebra	1.24
Sykes-Comstock Beginner's Algebra (optional)	1.19
Elson-Keck, Junior High School Literature Book 2	1.28

The other books may be ordered from Publishers direct at discount of 25% F. O. B. Publishers shipping point, or may be secured from Southern School Book Depository, Jackson, Mississippi. On some of these books the Depository will not be able to give the full discount, so it is suggested that you write them.

COUNTY TRAINING SCHOOLS AND FINANCIAL AID FOR SAME

This State is the recipient annually of a considerable sum of money from the John F. Slater Fund for assistance in the support of County Training Schools. There are certain requirements that must be met before the community can participate in this fund:—

Following are the minimum requirements in order to participate in the Slater Fund:—

1. The school shall be a public school with the property deeded to the county, state or district.
2. At least \$750.00 annual appropriation for salaries of teachers must be raised by the State, County or District.

3. The school must maintain at least an eight months session.
4. The teaching shall extend from the primary through eight grades, with the intention of adding at least two years of high school work. Enough land must be owned by the community to maintain a demonstration farm where the boys, under the direction of a well trained man in vocational agriculture, learn by actual experience the most practical methods of farming.

The school must maintain a Home Science department for the girls where both cooking and sewing are taught under the supervision of a competent teacher of these subjects.

At this time we have seventeen such schools in this state, located as follows:

County	School	Address
Bolivar—	Bolivar County Training School	Mound Bayou
Covington—	Covington County Training School	R. F. D. Mount Olive
Forrest—	Forrest County Duprest Training School	R.F.D. Hattiesburg
Grenada—	Grenada County Training School	Grenada
Humphreys—	Humphreys County Training School	Louise
Lamar—	Lamar County Training School	Lumberton
Lawrence—	Lawrence County Training School	Monticello
Lee—	Lee County Training School	Tupelo
Leflore—	Leflore County Training School	Itta Bena
Marion—	Marion County Training School	Columbia
Oktibbeha—	Oktibbeha County Training School	Starkville
Pearl River—	Pearl River County Training School	Poplarville
Pike—	Pike County Training School	Magnolia
Stone—	Stone County Training School	Wiggins
Sunflower—	Sunflower County Delta Ind. Inst. Training School	Doddsville
Union—	Union County Training School	New Albany
Walthall—	Walthall County Gintown Training School	R. 1, Box 1A, Lexie

From these schools come some of the very best colored teachers that we have in the State. Each of the schools is expected ultimately to maintain twelve grades of work, four years of high school work to be done as per the state course of study for colored high schools. The graduates from these schools doing four years of high school work as per the above are permitted to enter any colored college in the State without an entrance examination. There are approximately 5,000 boys and girls in training in these schools. More than 400 pupils in these schools are doing high school work.

The total cost of the school plants of the seventeen training schools in this State is approximately \$350,000. All are in modern buildings with the exception of two.

AID FROM JOHN F. SLATER FUND FOR TOWN AND CITY SCHOOLS.

A sum of money is given annually to the State from the John F. Slater Fund to assist in paying salaries of the industrial teachers in Home Science Departments. For the year 1922-23 the following schools received aid:

Vicksburg, McComb, West Point, Durant, Natchez.

This aid is given with the understanding that it will be gradually withdrawn after having been received for three years and given to other schools. The school will then be expected to carry on the work itself. The establishment of these departments in some of these schools has been the means of increasing interest on the part of the local authorities in bigger and better educational programs for the colored boys and girls and as a result two of the finest school buildings that we have in this State have been erected at a cost of \$75,000 and \$100,000 respectively.

JEANES INDUSTRIAL SUPERVISING TEACHERS OF MISSISSIPPI.

The Anna T. Jeanes Fund contributes annually a certain sum of money to the State to assist in paying salaries of a number of teachers known as the Jeanes Industrial Supervising Teachers. These teachers are employed by the County to supervise the industrial work of the various rural schools, to assist wherever they may in developing a better program for the colored schools, and also to assist the younger teachers in their work. In several counties the schools are grouped so that these teachers can meet several schools at some center in one day, thereby enabling them to aid each of the schools every month. In any county where there are more than one hundred schools the teacher could not be expected to make more than one visit a year to each school. But by this group system she is enabled to meet with each school every month of the school session. After the school term is over the Jeanes teachers conduct Short Courses in Sanitation with the grownups of the various communities, more especially with the mothers. They hold demonstrations in food conservation and the general up-keep of the home. During the summer of 1920, twenty-five Jeanes teachers representing as many different counties, were instrumental in canning 500,000 quarts of fruits and vegetables to be used in the homes of the people of these counties.

These teachers are employed for ten months of the year which makes it possible, not only for them to assist in the school work, but to aid in the club work of the various communities of the counties.

Each month a letter of suggestion of the work to be done during that month is sent the Jeanes Teacher by the State Agent and State Supervisor, in order that the work may be done in the proper sequence.

PROBLEMS OF SECURING COMPETENT TEACHERS.

Probably the greatest problem that we have in the State in putting across satisfactory educational program for the negro boys and girls is the lack of adequately trained teachers. In this state we have 418,481 negro children. This is 54.4% of the total educable population of the state. We

have 5,073 negro teachers in the state. Many of these teachers have had no special training for their work. The Agricultural and Mechanical College at Alcorn, the only state educational institution for negroes maintains a teacher training department and from this department we get some of the best teachers that we have. A state department of teacher training in vocational agriculture is maintained at this school and practically all of the vocational agricultural teachers have been trained in this department.

From Tougaloo College, Tougaloo; Jackson College, Jackson; M. I. C., Holly Springs; Haven Institute, Meridian; Utica Industrial Institute, Utica; Piney Woods Country Life School, Braxton; Southern Christian Institute Edwards; Okolona Industrial Institute, Okolona and The Mary Holmes Seminary, West Point, we get quite a number of well trained teachers and these schools together with a limited number of four-year high schools in the state and the county training schools are unable to provide us with enough well trained teachers, men and women, to take the place of the numbers of teachers who leave the profession annually. We are, therefore, forced to accept a certain number of teachers who are inadequately trained for the work. Since the records show that the teaching force of the state changes every four years we expect more than one thousand of the teachers to drop out of the profession every year. The above mentioned schools together with others in the state cannot supply the number of teachers necessary to fill the vacancies that occur each year.

In order to help these untrained teachers we maintain quite a number of summer school's each year. During the summer of 1922 seventeen summer schools, running six weeks each, were maintained by the county, state and general education board. Approximately 2,500 teachers were enrolled in these schools. Prior to the opening of the summer schools a short course was held at Jackson College, Jackson, Mississippi, where all of the instructors of the summer schools were given six days of intensive training in the work that they were expected to do in their respective summer schools. This proved to be one of the most helpful meetings ever held in the state. The instructors at this short course gained a knowledge of the general program that the state had for improving the scholarship of the colored teachers. Better work was done in these summer schools during the summer of 1922 than has ever been done before in the state. A sum of money was given by the General Education Board to pay the expenses of the instructors while they were in attendance upon this short course.

The State Department of Education each year prepares a course of study for the summer schools. At first the work was very elementary but every year the course is revised and added to. The teachers who have finished the eight grades in common school are given high school work in the summer schools and at the end of the session they receive credit for the work done. These credits are recorded in the office of the State Agent for negro schools and are transferred to any high school or college at the request of the teacher making the grade. The following table sets forth the data relative to the 1922 Summer Schools for negro teachers. The General Education Board helped in financing these schools as is showing in the following:

Name and Location of School				Sources of Funds		Total all Sources
	No. Instructors	Enrollment	G. E. B.	State, Co., or others	Students' fees

SUMMER SCHOOLS AT HAMPTON AND TUSKEGEE

The General Education Board gives annually a sum of money to be used in assisting to defray the expenses of a certain number of teachers in the state in attending Hampton or Tuskegee Summer Schools. Usually the principals of the County Training Schools are sent to Hampton Institute, Hampton, Virginia. The other teachers, such as primary teachers in the training schools and the Jeanes Industrial Supervising Teachers are sent to Tuskegee Institute, Tuskegee, Alabama. During the summer of 1922 practically 250 teachers attended summer schools outside of the state. However, only a few of these teachers received assistance in defraying their expenses.

ROSENWALD SCHOOLS.

Nothing connected with the educational program of Mississippi during the past several years has had more wholesome and stimulating effect upon the minds of the colored people and the general public than the Rosenwald Schoolhouse Building Campaign. This agency was made possible through the generosity of Mr. Julius Rosenwald, of Chicago, cooperating with the State Department of Education.

Under the inspiration of this movement, scores of modern school buildings have been erected in various counties, according to plan and specifications representing the best type of school architecture. Each building has, in addition to good, comfortable classrooms, well lighted, heated and ventilated, and of proper size, a room for industrial work. Connected with the larger schools (Training Schools) are Teachers' Homes. These school plants furnish splendid centers for teachers' meetings, mothers' clubs, Parent-Teachers' Associations, etc., and are frequently used for such purposes.

In the construction of these buildings, we have had the hearty cooperation of County Superintendents and local school officials. This new type of school building has not only served to influence patrons, friends, teachers and pupils, but it has created a demand for the "new type" of teacher. In practically every case observed, there is a disposition to place the "better prepared" teacher in charge of the Rosenwald School. The applicant for work in one of these schools seems to recognize in advance that some "special fitness" is required. Thus, many of them have been willing to make extra preparation, even at great sacrifice.

The consolidation of schools is, perhaps, one of the most interesting and helpful results of the work. Of the total number of Rosenwald schools erected in Mississippi, not more than a dozen are one-teacher schools.

The extent to which the colored people themselves have been stimulated and encouraged to greater effort and sacrifice in their own behalf has been most gratifying. Higher ideals and standards for school and home have resulted from the movement. Obviously, there has been a general awakening to appreciation of the importance of a "good school" in the life of the community. It has been our observation that wherever a properly constructed, well located, comfortable schoolhouse, in charge of a competent, worthy teacher is maintained, the community grows. That this is true is evidenced by the necessity for enlargement of such schools constructed only a few years ago, with ample facilities to meet the demand at that time.

The cost of constructing these buildings is shared by the following: (a) Public fund, (b) White people, (c) Colored people, (d) Mr. Rosenwald. In this we have not only positive surety for support in the construction of so many buildings, but a most effective and convincing demonstration of the progress that is possible through sympathetic cooperation for the mutual good of all concerned.

A more detailed account of the tangible results that have been accomplished may best be seen in the following table, which covers a period of two years:

SCHEDULES OF SCHOOLS BUILT

Showing the Different Type Schools and the Amount Contributed by the Various Agencies Working Through the State Department of Education.

PLAN FOR DISTRIBUTION OF AID.

From the Julius Rosenwald Fund for Building Rural Schoolhouses in the South for the Year Beginning July 1, 1923, and Ending June 30, 1924

1. The Julius Rosenwald Fund will co-operate with public school authorities and other agencies and persons in the effort to provide and equip better rural schoolhouses for the negroes of the Southern States, such equipment as desks, blackboards, heating apparatus, libraries and toilets being deemed of equal importance with the school houses themselves.

2. The sites and buildings of all schools aided by The Fund shall be the property of the public school authorities.

3. The trustees of The Fund and the State Department of Education have agreed as to the number of new buildings in the construction of which they will co-operate.

4. The school site must include ample space for playgrounds and for such agricultural work as is necessary for the best service of the community. Aid will be granted only when the site meets the approval of the State Department of Education and the General Field Agent of The Fund. The minimum acceptable for a school is two acres. For the larger school more land is desirable.

5. Plans and specifications for every building shall be approved by the General Field Agent before construction is begun. On request from the State Department of Education, The Fund will consider it a privilege to furnish general suggestions, plans and specifications for school houses.

6. It is a condition precedent to receiving the aid of The Fund that the people of the several communities shall secure, from other sources: to wit— from public school funds, private contributions, etc., an amount equal to or greater than that provided by The Fund. Labor, land and material may be counted as cash at current market values. Money provided by The Fund will be available only when the amount otherwise raised, with that to be given by The Fund, is sufficient to complete, equip and furnish the building.

7. The Fund will deposit with every co-operating State Department of Education a sum of money recommended by the General Field Agent to constitute working capital, from which the proper state official may make disbursements as required. Whenever the State Department reports to the General Field Agent any amount or amounts disbursed, with a statement showing that the work has been inspected and approved by an authorized representative of the Department, The Fund will replenish its deposit in the amount disbursed, if the inspection report is approved.

8. The amount appropriated by The Fund shall not exceed \$400 for a one-teacher school, \$700 for a two-teacher school, \$900 for a three-teacher school, \$1,100 for a four-teacher school, \$1,300 for a five-teacher school, \$1,500 for a six-teacher school or larger, and \$200 for the addition of a class room to a Rosenwald School already built.

9. Aid will be granted toward the construction and equipment of only those schools where the term runs at least five consecutive months.

10. Every community where an application has been approved agrees to complete, equip and furnish its school building before June 30, 1924, otherwise such application automatically cancels itself.

11. To insure the protection of the property and to make the school serve the broadest community interests, Teacher's Homes should be provided on the school grounds. In a limited number of selected localities, where the annual school term is eight months or more, The Fund will consider co-operation in the construction of Teachers' Homes, to be completed and furnished to correspond with the school building. The amount of aid to be given on a Teacher's Home shall not exceed one-half of the total cost of the building, provided the maximum from The Fund shall not exceed \$900 for any Teachers' Home. Just as in the case of school buildings, the Teach-

ers' Home must be deeded to the public school authorities. It is desirable for each of these homes to have a bath-room, and if possible, a bath-tub and wash basin. If there is ample water supply a handpower force pump with a tank can be installed at a very small expense, which will furnish water for the bath, a kitchen sink and the home economics room of the school.

VOCATIONAL EDUCATION IN COLORED SCHOOLS.

By F. J. Hubbard, State Director Vocational Education.

Five years ago Mississippi began her state program of vocational education. During the first year, 1917-18, there were three colored schools representing as many counties of the state that qualified and received state and federal aid through the state vocational board for instruction in home economics and in vocational agriculture. During the present year 1922-23, there are twenty-five departments in colored schools, representing eighteen counties of the state, that are receiving financial aid for instruction in vocational education. These twenty-five departments are distributed among the three types of vocational education as follows: One department of trade and industrial education; seven departments of home economics, and seventeen departments of vocational agriculture.

The promotion of trade and industrial education has been slow and somewhat difficult in this rural state where there are no towns of more than 25,000 population, and consequently few large trade and industrial centers. Prior to the beginning of the state vocational education program, no part-time or evening classes for adult colored persons had been conducted within the state. During the past three years the state vocational board has given aid to five such classes in the state. Three of these classes were conducted in cooperation with the colored city school of Meridian and embraced the following courses: One course for chauffeurs; one course in the Framing Square for carpenters, and one course in Reading House Plans for carpenters. The other two classes were conducted in the Hattiesburg colored school, and included one course in Reading House Plans for carpenters, and one class in Business English and Business Arithmetic for porters and draymen. All of this trade and industrial education was conducted in evening classes which were held at the local high school two or three evenings per week. The state vocational board has been paying two-thirds of the cost of the instruction, and there have been more than one hundred colored working men taking instruction in these classes.

In vocational home economics education, the comparatively small amount of funds available to the state vocational board has been the limiting factor in promoting the work in the state. It will be noted above, however, that the number of colored day schools giving courses in vocational home economics and receiving state and federal aid has grown from three in 1917-18 to seven in the present year. In addition to the day schools, there have been conducted in the state seven evening classes in home economics, with a total attendance of 388 colored women. These evening courses have embraced practical instruction in cooking, sewing, laundering, and in other subjects closely related to the colored woman's daily work.

It is in vocational agriculture that vocational education has made its most rapid progress and probably rendered its greatest service to the colored schools of the state. The increase in numbers of these vocational agricultural schools has been from three schools representing three counties in 1917-18, to seventeen schools located in seventeen different counties of the state during the present year. This increase would have been much larger if qualified teachers for this work could have been found.

In the beginning years of the work, the teachers of vocational agriculture were not well trained for their work, but there has been each year a marked improvement in the qualifications of these teachers. The first results of this improvement is that seventy-five per cent of the agricultural teachers for the present year are full graduates of the agricultural education department of Alcorn A. & M. College, who hold regular vocational teachers' license issued by the state vocational board. The second result, naturally is a decidedly higher standard in the efficiency of the instruction in vocational agriculture and a broadening of the activities of the vocational agricultural school. These schools must meet certain standards on material equipment, course of study, and must also employ a trained agricultural teacher for twelve months in each year. The state vocational board pays three-eighths or more of the annual salary of the agricultural teacher, so these schools can employ a well-trained agricultural teacher for the full year at no greater cost to the local school district than that which has been necessary formerly to employ a teacher for only the regular school sessions. This teacher not only teaches agriculture in the school, but he supervises certain practical agricultural work of the pupils at their home. He helps the farmers of the community spray fruit trees, treat sick farm animals or to solve any other farm problem with which the colored farmer may need help. The pupils in the class of vocational agriculture at each school are required to carry on some kind of agricultural project at home each year. Accurate records are kept on the cost, yield, labor and net profit made on each project, and the teacher must send a statement of this project work to the state vocational board each year. In many schools the total net profit made on the pupils' agricultural projects has reached an amount three times as great as the amount of money spent for the agricultural teacher's salary during the year. In 1920-21 the total net profit from pupils' agricultural projects in all the colored vocational schools of the state was two and three tenths times the total cost of agricultural instruction to those pupils for that year.

County Training Schools from 1911-12 through 1922-23	\$34,308.26
City Schools from 1913-14 through 1922-23	7,555.00
Private Secondary, Schools and Colleges from 1910-11 through 1922-23	34,450.00
Total	\$76,313.26
March 9, 1923.	

JEANES FUND**Mississippi.****From 1909 to 1922, Inclusive**

Jeanes Fund:	
Salaries	\$67,088.59
Extension of Terms	225.00
Summer Schools	250.00
Railroad Fare to Conferences	1,265.86
Building and equipment	1,630.00
Total	\$70,459.45

COURSE OF STUDY.

For County Training Schools and High Schools for Negroes in Mississippi.

First Year.

Required:

English 1

For Boys:

Agriculture 1

For Girls:

Domestic Art 1

Domestic Science 1

Electives:

Ancient History 1

Algebra 1

Music 1

Woodwork 1

Physical Training 1

(Inc. personal hygiene)

General Science 1

Second Year

Required:

English 2

For Girls:

Domestic Art 2

Domestic Science 2

For Boys:

Agriculture 2

Electives:

Biology 1 (inc. personal
hygiene)

Geometry 1

Med'val and Mod. History 1

Music 2

Woodwork 2

Physical Training 2

Any electives offered in first year.

Ancient History 1

Third Year

Required:

English 3

Biology 2 (Inc. personal
hygiene)

Electives:

Education 1

Agriculture 3

Geography Ec.

Advanced Arithmetic

Chemistry 1

Physiology 1 (and community
hygiene)

Latin 1

Domestic Art 3

Domestic Science 3

Any electives offered in second
year

Med'v'l and Mod. History 2

Fourth Year

Required:

Amer. History, including negro
history

English 4

Electives:

Algebra 2

Physics 1

Latin 2

Spanish 1

Civics and Ec. Geography

Agriculture 4

Education 2

Any elective offered in third year.

Home Economics 4

Course of Study for College Entrance Requirements:

English 3, Mathematics 2, Science 1, Social Science 2, and seven remaining units to be chosen from a list of approved electives. This course shall consist of at least fifteen units (pp. 14-15 Bulletin 23.)

Any school approved for four units of standard high school work shall be recognized as an accredited one-year high school; for eight units of standard high school work, an accredited two-year high school; for twelve

units of standard high school work, an accredited three-year high school, and for sixteen units of standard high school work, an accredited four-year high school, provided the conditions and requirements of the State Accrediting Commission be met, as indicated on pages 100-102, Bulletin 23, 1921, except that requirement No. 19 shall read "The number of pupils in any high school class shall not exceed forty."

We recognize the need and importance of well trained, efficient teachers in the high schools. One or more of the teachers employed should hold a diploma or certificate of graduation from an accredited college, but we recommend that in case of necessity, or in exceptional cases, teachers with less than a full college course be accepted, and that high school graduates be employed provided they continue their education by advanced courses.

No school will be approved that does not have sufficient Library and Laboratory equipment to teach the courses offered in English, History and Science.

(a) For English the equipment should include at least several series of Supplementary Readers, Standard Unabridged Dictionaries, Encyclopedia, Standard Classics and Biographies.

(b) For teaching the Social Sciences, including History and Civics—More comprehensive works for collateral reading on United States History, Modern History or European Nations and History of the Ancient Worlds; Standard works on Government, Modern Social Activity and Community Civics.

(c) For Teaching Natural Science—Sufficient laboratory space and equipment for individual student work in Elementary Biology, Chemistry and Physics.

SUMMER NORMALS FOR TEACHERS.

Summer Normals were held at the usual time at places convenient for the teachers, white and black.

The work in these schools is now so arranged that all work done may be made to count toward a diploma or degree in high school or college.

Approximately 5,000 teachers attended summer schools last summer.

OCTOBER DISTRIBUTION OF THE COMMON SCHOOL FUND—1921

County and School	No. Educable Children	Amount
Adams County	5,203	\$4,766.98
